c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

Section 1089 of Public Law 115-232, "Policy on Response to Juvenile-on-Juvenile Problematic Sexual Behavior Committed on Military Installations," mandates the establishment of a centralized database of information on incidents of problematic sexual behavior in children and youth on military installations. The DoD established the PSB-CY Information System to satisfy this legal requirement, and allow the Department to document, coordinate, and manage the full continuum of care provided to children, youth, and their families. This is done in order to identify, characterize, respond, and intervene in all allegations and incidents of PSB-CY received by the installation Family Advocacy Programs, regardless of whether the sexual behavior is categorized as normative, cautionary, or problematic at the time of referral or as a result of the review.

The PSB-CY Information System captures inputs from multiple DoD agencies, thereby consolidating and tracking record-level information for each allegation or report of PSB-CY reported to the Department and reviewed by the Family Advocacy Program. Tracking in the PSB-CY Information System spans the full life-cycle of an allegation or report from the receipt of the referral or allegation to case closure. The full life-cycle begins with: consolidating and tracking the referral from the time of the allegation or report to the Family Advocacy Program; categorizing the sexual behavior as normative, cautionary, or problematic; convening the PSB-CY multi-disciplinary team when warranted; and coordinating or providing services through a continuum of care to resolution and closure. Additionally, the system is also used as a management tool to support statistical analysis, tracking, and reporting to ensure continuous improvement.

Information within the system may be collected on the exhibiting child under the age of 18 years at the time the sexual behavior allegedly occurred; impacted child(ren) under the age of 18 years at the time the sexual behavior allegedly occurred; and the parent/legal guardian of exhibiting and impacted child(ren).

Records collected concerning the child (to include the exhibiting child and impacted child(ren)) include: Name; age; date of birth; Social Security Numbers (SSNs); emergency contact data; sex; medical information such as case notes, clinical assessment details, description of incident including categorization (normative, cautionary, problematic), law enforcement information, risk and safety plan, supervision, clinical treatment plan.

Information collected about the parent/legal guardian of the child(ren) includes: Date of birth; Department of Defense (DoD) Identification Number; rank/grade; marital status; work and home contact information (such as phone number and/or cellular phone; mailing and email addresses to include official duty address); military records; race/ethnicity; and education information.

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

Identification and mission-related use

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

Individuals are provided a privacy act statement at the time of assessment and interviews (initial point of collection) to facilitate informed consent. However, failure to provide such information may hinder DoD's ability to provide necessary services needed for the exhibiting child, impacted child(ren), and their families.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

Individuals are provided a privacy act statement at the time of assessment and interviews (initial point of collection). Once collected, however, the information may be used for any purpose outlined within the privacy act statement and system of records notice, in accordance with the requirements of all applicable authorities.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)
